Further training and professional experience

January 2018 - January 2024 Project Analyst, Pereira Risaralda, Colombia

Position: In my current role as Project Analyst at TIGO-UNE, in Pereira, Colombia, I have focused on the management of integrated services projects in the areas of IT and telecommunications, as well as I have participated in the construction of networks such as FO, FTTH, VoIP, HCS, Wifi. I have quickly acquired skills in preventive maintenance, design, stakeout and corrective maintenance of these telecommunications networks. In addition, I apply agile and project management techniques to plan, execute, control and close projects, setting priorities and ensuring problem solving to achieve the objectives. I have participated in the expansion of networks (copper, HFC, FO) and the implementation of new technologies such as Gpon and FTTH. As part of a regional government program, I have managed the installation of more than 100 free wifi zones for the population. I can interpret blueprints and network topologies, and I have experience in integrating different areas such as sales, pre-sales, product and suppliers to move projects forward, always giving an excellent treatment both internally and externally, and taking into account the needs of customers. Skills and Characteristics: Telecommunications project management Corrective and preventive maintenance

Independence, assertiveness, and teamwork skills Troubleshooting and repair Work in the construction of new FO and copper networks, in these we practice maintenance and corrections, in aerial and terrestrial networks.

Jun 2000 – Jun 2001 Gran Hotel Pereira, Risaralda, Pereira

Position: (Various trades in the hotel industry) I performed duties as a receptionist and provided support for various services in the hotel, such as bellboy, kitchen assistant, dishwasher, waiter, and driver for transporting provisions and supplies for the hotel. Always providing the best service to both external and internal customers with respect and friendliness.
